

Antonio Scotland

SENIOR BUSINESS SYSTEMS ANALYST | DATA & SYSTEMS INTEGRATION

Waterloo, ON • antonio.k.scotland@gmail.com • LinkedIn • GitHub

EXECUTIVE PROFILE

Senior Business Systems Analyst with specialized expertise in wealth management data flows, system integrations, and technical requirements elicitation. Proven track record of bridging the gap between business partners and IT to develop scalable solutions within enterprise systems and data hubs. Highly proficient in utilizing SQL for complex data analysis, defining API behaviors (Swagger/OpenAPI), and driving process standardization within cross-functional Agile environments to ensure seamless platform delivery.

CORE TECHNICAL COMPETENCIES

BUSINESS SYSTEMS ANALYSIS

Requirements Elicitation, Data Mapping, Process Mapping, BRDs, Workflow Analysis, RTMs, UAT Support, Stakeholder Management.

SYSTEMS & DATA INTEGRATION

SQL Database Querying, Data Flow Analysis, System Integrations, API Specifications (Swagger), Business Validation Rules, Error Handling.

TECHNICAL ARCHITECTURE

Relational Databases (PostgreSQL, MySQL), Node.js, Express, React, Python, JavaScript, REST APIs, Git Version Control.

QA & AGILE METHODOLOGIES

Jira, Confluence, Defect Triage, Functional Testing, Regression Testing, Acceptance Criteria, Cypress, Microsoft Playwright.

PROFESSIONAL EXPERIENCE

Business Systems Analyst | Cocoa Classroom 07/2025 – Present

- Elicit, analyze, and interpret complex system requirements for AI-generation workflows, mapping business logic directly to technical system behaviors and scalable data solutions.
- Query relational databases using SQL to validate data constraints, metadata outputs, and platform integrity during the migration of existing platform units into a shared service architecture.
- Develop complete technical deliverables including system specifications, developer prompts, API logic definitions, and rigorous QA acceptance criteria.
- Lead technical reviews and problem-solving initiatives with engineering teams via Git PRs, Jira, and Confluence, identifying regression risks and ensuring robust data management practices.

Business Analyst (Contract) | Fintex Inc. 06/2024 – 06/2025

- Served as Subject Matter Expert (SME) analyzing critical data flows, API specifications, and file formats across Wealth Management domains, specifically focusing on FNZ, Aviso, CIF Matching, and Investor Portal systems.
- Documented end-to-end technical solutions, translating complex business needs into data mapping guides, validation rules, Swagger/API specs, and comprehensive BRDs.
- Facilitated cross-functional technical design sessions with compliance, FNZ stakeholders, QA, and development teams to clarify requirements and resolve urgent system integration blockers.
- Translated technical data requirements into testable scenarios and system behaviors, facilitating QA alignment and ensuring the successful deployment of wealth account opening platforms.

PROFESSIONAL EXPERIENCE (CONTINUED)

Web Development Mentor | *Lighthouse Labs*

03/2024 – 06/2024

- Mentored technical cohorts in the design and development of full-stack web applications utilizing PostgreSQL databases, Node.js, and complex backend routing logic.
- Conducted technical triage and problem-solving sessions, analyzing system bugs to enhance database query performance and overall application stability.

Frontend Developer Intern | *Vosyn*

01/2024 – 05/2024

- Collaborated across the Agile application lifecycle to design, build, and debug high-quality UI components, ensuring reliable integration and interaction with backend REST API endpoints.

Web Developer (Contract) | *EdTek Services*

12/2023 – 02/2024

- Led the development and deployment of interactive web features, continuously incorporating technical stakeholder feedback to optimize functionality and data presentation.

TECHNICAL PROJECTS

InvoiceNow Application

12/2023

Engineered an end-to-end financial application empowering users with seamless capabilities to generate, dispatch, monitor, and receive payments on digital invoices.

Tech Stack: PostgreSQL, Express, React.js, Node.js, Stripe API, Twilio API

OmniEats Platform

08/2023

Developed a robust food ordering platform focused on real-time order tracking, database management, and responsive user engagement.

Tech Stack: PostgreSQL, Node.js, Express, EJS, Twilio

EDUCATION

Diploma, Full Stack Web Development Lighthouse Labs	12/2023
Master of Applied Science, Electrical Engineering University of Waterloo	06/2013
Master of Business Administration (MBA) Howard University	12/2010
Bachelor of Science, Electrical Engineering Howard University	05/2009
